### Objective

Certified Public Accountant with a robust foundation in fiscal management and a proven ability to leverage technology for strategic advancements. At Siemens Gamesa, I have effectively led projects that not only enhance financial processes but also align with broader business objectives, demonstrating my capacity to grasp the big picture without losing sight of the details. Eager to transition into a managerial role, I aim to lead teams that continue to drive our commitment to innovative and sustainable energy solutions.

### Experience

#### Siemens Gamesa Renewable Energy Commercial Project Manager

Orlando, FL  
May 2022– Present

- Developed and launched a comprehensive Power BI dashboard to bridge gaps between cost center financials and operations. Following its proven success the dashboard was adopted across multiple business units, becoming a pivotal tool for over 100 operations members in enhancing strategic decision-making and operational efficiency.
- Addressed financial reporting inefficiencies by leading the development of a machine learning algorithm, which automated cost categorization for over 400,000 records (achieving 99.96% accuracy). Personally oversaw its rollout and implementation into a Power BI visualization, which streamlined project financial reporting to save the finance team 32 hours per month.
- Automated invoicing process for over \$41 million in annual billings, resulting in increased standardization across projects, time savings of eight hours per month, and accelerated cash collection.
- Conducted monthly meetings with nine operations counterparts to review site activities and their financial consequences. Consolidated into high-level reporting to the Head of Finance on a bi-monthly basis, with emphasis on cost variances and long-term cost adjustments.
- Implemented a rigorous accountability framework for labor reporting by site managers, resulting in 100% precision of labor clearances for the fiscal year.
- Supported sales initiatives by quantifying the financial impact of potential deals, assisting in securing new project scopes and extending existing contracts through detailed cost-benefit analyses.

#### KPMG, LLP Experienced Audit Associate

Jacksonville, FL  
January 2021 – May 2022

- Supervised and mentored teams of three in conducting quarterly reviews for two Large Accelerated Filers, ensuring adherence to reporting deadlines while remaining within engagement budgets.
- Leveraged Power BI to evaluate a critical risk area, successfully identifying overlap with established procedures to eliminate 24 hours of redundant substantive testing.
- Streamlined Revenue and Cost of Service testing by 15% through innovative implementation of data pre-processing routines, which automated sampling and validation checks over the client's full transaction population.

### Education

University of Florida  
Master of Science in Information Systems and Operations Management

Gainesville, FL  
December, 2020

Florida State University  
Bachelor of Science in Accounting, Management Information Systems

Tallahassee, FL  
May, 2019
